About This Game

** Stream Animals Currently only works for Twitch.tv Streamers **

Stream Animals brings you closer to your streaming community. You and your viewers try to be the last one standing as the land falls into the water.

Your viewers use your streaming channel chat to decide their moves. Then the fun begins as random or voted events trigger falling blocks, player fights, or birds coming to get them!

As the last animal standing, doesn't always mean you're the winner. If the birds and players don't get you, the events can still take you out!

Features

- Play with your stream chat through Twitch.
- Viewers can vote on events.
- Up to 64 players from your stream chat.
- Map size scaling based on player count.

-
- 10 Events that can be toggled on/off
 - 4 Level themes with 3 scaling sizes

Title: Stream Animals
Genre: Casual, Early Access
Developer:
Smash Bolt Games

game DOESNT EVEN HAVE A QUIT BUTTON. It may not be the best example of story-telling you've ever seen, but by jove, the gameplay more than makes up for it.

If you haven't seen PopCap's 'twist' on the Match-3 genre of casual games, this will come as a total surprise. If you have, then you may appreciate the further strategic bent this lends to the original design.

Instead of swapping turns with an omniscient and overly-planning AI opponent (Puzzle Quest), the outcome of each match can be determined almost solely by the player. Moves must be selected carefully to prevent opponent's skill gems from counting down, while also trying to detonate your own. Features originally introduced as chains and locks make a comeback, but are used as skill results, not just randomly mixed in.

Overall, don't miss this. It's a fantastic example of how to blend two genres of gameplay into a masterful whole.. Needs local multiplayer like the original for that couch PvP goodness.. This game is very fun. You have to get it and be the worst brat ever.

Nice job Flying Oak Game !. RUSSIANS BAD

AMERICANS GOOD

AMERICANS SHOOT RUSSIANS

HELL YEAH/10

One of the best game series that has sadly never been finished. Looking forward to the success of Shenmue III so the franchise can complete the story.. Not much fun.

Just kill time.

Actually there's no evident deficiency.

Still recommend , if just kill time.. A poorly optimised, sluggish and buggy marble run game, that said it is one of the better Atum Software/Sometimes You games, although that really isn't saying much.. I have played this game for an hour, giving it its chance despite of the ugly interface which unwelcomes the player. The campaign is a succession of battles, devoid of sense. There is no story, and I didn't really get how to expand its army through the different missions. I think I simply cannot. This is all the more regrettable as this kind of bare bones game could beneficiate a lot from a good little well-told story. The other type of game is the dungeon. This one is funnier. Maps are like a maze and you explore it with your units turn by turn just like in a board game. Its is quick-paced and enjoyable. Money can be gathered to expand the size of the army (yes, it works perfectly in the dungeon mode).

But the reason I really DON'T recommend is because there is no options whatsoever, and, worst of all, NO SAVEGAMES. If you die, you restart from the beginning. If you leave the game, you restart from the beginning. From the very beginning. Your progress through the dungeons? The army you expanded with gold? All gone, start again. Or not.

It could have been a fun little casual board-like game, but in this state, it can barely be called a game. It is in great need of fixing. However, it has not been updated from a year or so, do just like the devs, and forget it.. This game will haunt my dreams. I am obsessed. The music runs through my mind, and I hear laughter in the background.

If you're into narrative-heavy games but need them to be attached to good gameplay mechanics, this is your game. It's easy to find yourself obsessing over it; which is fitting, given the theme of the game.

Just take care not to lose your own soul while trying to restore your daughter's.. what a disappointment objects are in places that cant even be clicked on game is glitched hard and some items that are out in the open need to be clicked multiple times before it works i personally feel the game was a waste of money. Full Spectrum Warrior is a great game, though it is old, and it clearly shows. I remember playing this game on the original Xbox, and I enjoyed it so much that I remember that I ended up writing a report on it, as well as doing some research on it as well. Originally an Army idea to train soldiers, the game gave also saw the rise of another training aid that replaced the game, and created a bit of a controversy.

The game uses the typical Army scenario of a conflict in a made up country, using information from real world areas to make up things like demographics. You end up taking command of a squad, composed of two fireteams that mirror eachother in layout but have some different characters that attempt to give you a connection to the men; sort of giving them life. Going through various missions, you will occasionally pick up a Charlie team to help complete objectives, and utilize the sitrep system to save your progress.

The game can be tough, as it requires you to be a mix of cautious but aggressive. You need to use both teams to effectively move around the mission area, and to obviously complete your objective; this idea will get hammered into your brain fairly often and early on. Teammembers can get wounded, though I do believe the limit is one per team, and anymore then that will cause the mission to fail. If a teammate is wounded you only have so long to get to them before they bleed out, at that point one of your other soldiers must firemen carry, and you need to drop him back off at a CASEVAC/Resupply point; this eliminates another soldier from being combat effective. Though once you pick him up you can take your sweet time.

The game is not an FPS, not a TPS, if you haven't guessed already. Instead it is a real time squad tactics game, with some somewhat lackluster camera angles. However its a good buy that will keep you busy for several hours to say the least, and it has sequel out that adds some cool new features as well; like buddyteams. A fun game, and perhaps it connects more to me since I played it when it came out, and it harks back to those military days. Embrace the suck without actually embracing the suck.. Flood of Light is a beautifully hand-drawn 2D puzzle game that serenades the player with piano music while they travel through a city solving puzzles. Although the game is quite basic in regards to gameplay, the audio and visuals combine to make a very enjoyable and overall relaxing experience.

My only criticism of Flood of Light is that although the game *is in English, it is clear that it was not the devs primary language as there are some small grammatical errors through-out. Not a big deal, just something to keep in mind if you decide to pick it up.*

I would recommend Flood of Light to those who enjoy games like Journey and Abz\u00fb, or for someone who wants to relax after a long day at work or school.. Hidden 'On the Trail of the Ancients' has a lot going for it but it is hugely overpriced given its extremely short play time. Expect no more than 4 hours, even if you end up stuck on the puzzles for some time.

Without a doubt, I'd say that this is a great start to a point and click adventure. The voice acting and graphics are good quality, there are some interesting puzzles and the 'creepy' factor is well pitched. You see the beginnings of a well thought out supernatural horror story with enough detail to make you want to know more and well pitched tension leading to some properly 'jump out of your seat moments'.

The problem is the game is over before you feel it has begun. The story is set up but hasn't developed at all. If this had been marketed as an episode 1 of a longer story and priced as such then I would not complain. But it is shorter than a single episode of many other games and at least twice the price.. its not the best but its good for if you are bored or doent have anything to do.
